Montréal

PROFESSIONAL SUMMARY

Full-stack developer and software engineering student at UQAM, currently building production-grade applications used by real customers. At Galeries L'Original, I ship features for two live platforms — a custom art product and a marketplace serving Montréal's Vieux-Port and Plateau galleries — working across Next.js App Router, server-side data flows, and TypeScript-safe integrations. I approach software end-to-end: from crafting interfaces people actually enjoy using, to designing the backend logic and data architecture that keeps things running reliably. I care about clean code, maintainability, and shipping things that work in production — not just in development. Comfortable working with AI-assisted development tools (Cursor, Claude) to accelerate delivery while maintaining code quality.

WORK EXPERIENCE

Full-Stack Developer Intern — Galeries L'Original

May 2026 - Present

Galeries L'Original • Montréal

- Contributing to two production platforms serving Montréal's art community: a custom art product (artur.art) with live previews and personalization, and a flagship marketplace (loriginal.org) covering artist discovery, murals, and originals.
- Working across Next.js App Router, TypeScript, and server-side integrations — shipping UI improvements, resolving bugs blocking real users, and maintaining a bilingual FR/EN experience optimized for performance, accessibility, and SEO.

Freelance Full-Stack Developer — E-commerce Platform for M. Dave

Jan 2026 - Apr 2026

M. Dave • Montréal

- Designed and built a complete custom fashion e-commerce platform from scratch for an independent client.
- Handled the full project lifecycle solo — from requirements gathering and UI design to backend logic, database integration, and deployment.
- Delivered a live production site with real paying customers, built with Next.js, Tailwind CSS, and Supabase.

Database Instructor — SQL & Relational Databases

Dec 2025 - Dec 2025

Online

- Designed and delivered a multi-session online revision program in SQL and relational databases for a group of ~20 students, covering core concepts through Oracle Database.
- Structured sessions around exam preparation with progressive exercises and project-oriented examples, adapting explanations in real time to a remote audience.

Programming Instructor — Web, JavaScript & Java Fundamentals

Sep 2025 - Sep 2025

Online

- Designed and delivered a multi-session online revision program in web and Java fundamentals for a group of ~20 students.
- Covered HTML/CSS, JavaScript, Java syntax, and object-oriented principles, with hands-on exercises tailored for exam preparation.

EDUCATION

Software Engineering (B.Sc.)

2024 - Present

Université du Québec à Montréal (UQAM) • Montréal

SKILLS

- **Front End:** HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Sass, Figma
- **Backend:** Java, Maven, Node.js, SQL, MongoDB, MySQL, PostgreSQL, Supabase
- **DevOps:** Linux, Docker, Git, GitHub, GitLab, AWS
- **Systems & Languages:** Assembly, C, C++, Java
- **AI Tools:** Cursor, Claude (AI-assisted development)

VOLUNTEER WORK

Conference Volunteer — ConFoo Montréal

Feb 2026 - Feb 2026

ConFoo • Montréal

- Assisted with event setup, technical checks for speakers (AV, connectivity, demos), and on-site coordination to ensure sessions ran smoothly for speakers and attendees.

Founder & Project Lead — Codysey (Micro Club IT)

Mar 2025 - Present

Micro Club IT

- Founded Codysey, an educational initiative within Micro Club — the largest IT club in Algeria — creating a dedicated branch where students produce and explain technical course content to support peer learning.
- Worked closely with the Head of the IT Department to structure the project, coordinate contributors, and guide its growth

AWARDS AND HONOURS

Ideathon Winner (Team Project)

2023

- Collaborated with the team to define the app concept and user flows
- Designed and built a solution enabling communities to locate disaster-affected individuals
- Implemented features for requesting and coordinating essential aid
- Presented the winning pitch to judges and stakeholders
